Subject: FlyH2 Aerospace Nomination

Hi there,

I would like to please nominate FlyH2 Aerospace for our contributions to a long term vision of decarbonising aviation in Africa as well as making aviation more accessible in Africa. We're starting with much needed long endurance security drones to help South Africa protect its fisheries (food security), borders (economic protection), and railway and power infrastructure (keeping South Africa working).

Although we are a pre-revenue start-up, we deserve and need to recognition. Developing fuel cells is difficult and changing the aviation industry is difficult. Recognition from the Cape Chamber has the potential to change this - by showing investors that our efforts are recognised as worth-while!

Please see our video: <https://www.loom.com/share/02d6072dcf8b4ab3a6c6aa2cc39c19b8>
And yesterday's press release: <https://www.suasnews.com/2026/02/south-african-fuel-cell-milestone-signals-momentum-for-hydrogen-aviation/> <- Please read this!!!

And our application is attached.

Thank you for your consideration. Please confirm receipt of this email.
