

AIMS

African Institute for
Mathematical Sciences
SOUTH AFRICA

1. OUTPUT

A highly **collaborative** education model that identifies **industry needs**, and creates a **network of partners** to best meet those education and training needs.

2. OUTCOME

National and international partnerships enable access to in-demand knowledge and skills

Produces graduates with **high-level quantitative and AI talent**, who directly strengthen the Western Cape knowledge economy

3. IMPACT

A growing pipeline of high-impact skills feeding into the economy & education system

Positions the Western Cape as a **global hub for mathematical sciences & AI**

4. LONGEVITY

10+ years
sustained impact

Developing Africa's future leaders in mathematical sciences and AI.
Collaborative. Innovative. Impactful.
