

# FLUORO BIOTECH

## 01. CATALYTIC OUTPUT

Produces recombinant proteins - the most **expensive ingredients** in **medication** and **vaccine** production – with:

**25%** less capex

**1/8** of the time

**150%** greater yields for same input

## 02. OUTCOME

Vaccine and medication production can become **possible in Africa**, where it is currently impossible due to the costs of production.

## 03. IMPACT

**Local production enables:**

- **Reduced costs** for medication & vaccine production
- Potential for **medication security** in Africa
- Reduced **delivery times**
- Increased **exports**
- Increased **local employment** in science

## 04. LONGEVITY

**For the foreseeable future**

INNOVATING TODAY. EMPOWERING AFRICA. IMPACTING TOMORROW.
